```
abi::Reflection::Creation
// Loop through all of the component's properties defined in xml
for (ComponentData& componentData : componentData)
{
    // If the property is referencing this component
    if (componentData.m_Id == propertyComponentRef)
    {
        // Foreach property on that component
        for (PropertyData& propertyData : componentData.m_Properties)
        {
            // If we find the property, override it
            if (propertyData.m_Id == propertyId)
            {
                propertyData.m_Value = propertyValue;
            }
        }
    }
}
```

PROFILE

I am an undergraduate Gameplay Engineer with a year's industry experience at Playground Games using C++ & C# to develop Forza Horizon 5 and its Rally Adventure DLC. Key to my role was ensuring stability of the game using player emulation testing through Microsoft's Intelligent Bot Automation toolset.

I am set to graduate from the University of the West of England in 2024 with a first class in Games Technology (BSc Hons). Here I have gained 3 years of practical experience with both object oriented and data driven development. I have completed solo and team projects using C++, C#, DirectX and Unity (see my [portfolio](#)) and have been recognised for excellence by inclusion on the Dean's list.

To further develop my skills I have also undertaken personal projects including a [custom C++ engine](#) with DirectX and an Entity Component System, and created my own full release game "[Wardens Teddy](#)".

I am now seeking to continue my career in the games industry as a Gameplay Engineer.

EXPERIENCE

Playground Games – Gameplay Engineer

June 2022 – PRESENT, Leamington Spa

- C++ & C# development in bespoke engine for Forza Horizon 5 on the Gameplay and Live teams.
- Shipped [Horizon Rally Adventure](#) DLC on Xbox and PC.
- Investigated, planned and produced end to end automated testing solution using [BotBrain](#).
- Collaborated internationally with Microsoft Studios based in the USA and Poland.
- Planned and costed tasks, working within team sprints.
- Presented developed features to stakeholders.

University of the West of England – C++ Mentor

September 2021 – May 2022, Bristol

- Planned and ran code support sessions for first and second year Games Technology students.
- Earned the [ILM Award](#) in Effective Mentoring.
- Secured my own industrial placement, then gave a presentation to the following year group detailing my experiences and recommending strategies to adopt.

SKILLS

Technical

C++, C#, Version Control (Perforce/Git), Testing, Continuous Integration (TeamCity), Visual Studio

Engines

Bespoke C++ Engine @ Playground, DirectX (own engine), Unity, Unreal / Visual Scripting

Personal

Teamwork, Communication, Presentation, Planning, Time Management

Miscellaneous

Python, Power BI, Kusto, Web (HTML/CSS/JS), Teams/Office Suite

EDUCATION

University of the West of England – Games Technology BSc (Hons)

UWE is TIGA Accredited

September 2020 – June 2024, Bristol

Working Grade: 1st Class

Lord Williams School – A Level & GCSE

September 2013 – June 2020, Thame

3 A Levels, grade A, including Computer Science (A)

9 GCSEs, grades 7-8, including Maths (7) and English (8)

ACHIEVEMENTS

Achieved inclusion on the Dean's List for first-class working grade across all university modules.

Completed ILM Level 3 effective mentoring scheme.

Completed all levels of the [Duke of Edinburgh's Award](#), including Gold.

Competed in swimming at a national level.

HOBBIES

Running, Climbing, Travel, Programming, Korean, Reading, Swimming, Playing Games
